Website Design and CMS – Required Improvements

1. Navigation Bar Lacks Animation and Premium Dropdown Interaction

- Chasehorse font has to be redesigned to match the logo.
- We need to increase the space between the menu

Menus

1. Platform

   Once we click on the platform menu it should directly go the service pages where we are showing all our services like tier1,2,3

   Replace the Why GELP with What is GELP .

   How it works?

   Platform Features

   Capabilities

   All Service heading need to remove

   Technology integration

   Flexible finance models

   Skilled ready resources

   business scalability

   Get Started

   Ask for trials!

   Book a demo

   Let’s connect (whatsapp integration)

   Design your platform

   The Text has to be edited and GELP Must be in the bracket

2. Solutions

Please refer the screenshot and reflect the same

- Sectors
- Industries
- Partner ecosystem
- **Design your solution (DIY)**
- Customised solution

Design Your solution : To be included under Solutions Menu

It should be like this so they can select the service they needed based on their requirement

TIER 1 → CORE BUSINESS

- ☐ **Digital Transformation**
  - ☐ Transport Management System (TMS)
  - ☐ Online Procurement
  - ☐ Contracts – RFQ & Approvals
  - ☐ Inward Consignment Visibility
  - ☐ Data Analytics – MIS
- ☐ **CH Deploy**
  - ☐ Warehouse Inspection
  - ☐ Unloading Site Monitoring
  - ☐ Loading Site Monitoring
  - ☐ Audits at 3PL Warehouses
  - ☐ GST Office Coordination
- ☐ **8D Customer Complaints**
  - ☐ Ewaybill Management
  - ☐ Stakeholder Collaboration
  - ☐ Time Based Closure
  - ☐ Deep Research & Root Cause Analysis
  - ☐ Linked to Customer Experience (CX)
  - ☐ KPI Tracker & Analytics
- ☐ **Merchandise & PPEs**

TIER 2 → STRATEGIC & GROWTH

- ☐ **Digital Advancement**
  - ☐ TMS Advanced
  - ☐ Data Science & Machine Learning
  - ☐ Automations
  - ☐ Generic AI Utilization
  - ☐ On-job Tech Training
- ☐ **Optimization Tools**
  - ☐ Freight Optimization
  - ☐ Routes / Lanes Rationalization
  - ☐ Supplier Integration
  - ☐ Load & Capacity Optimization
  - ☐ Freight Bills Authentication
- ☐ **DEPLOY-CDX Pro**
  - ☐ Technical On-field Leads
  - ☐ On-field Incident Support
  - ☐ Training Programs
  - ☐ Stock Taking
  - ☐ Quality Testing
- ☐ **Fleet & Driver Management**
  - ☐ Accessories for Drivers & Trucks

TIER 3 → ADVANCED TECH

- ☐ **IT & Advanced Tech**
  - ☐ AI Deployment
  - ☐ Drone Utilization
  - ☐ IoT & Automations
  - ☐ Data Science & Machine Learning
- ☐ **Operational Advancement**
  - ☐ Cargo Lashing Techniques
  - ☐ Palletized Movement
  - ☐ Bar Coding & CAMS
  - ☐ Robotics
- ☐ **Fleet Operations**
  - ☐ Truck Deployment
  - ☐ Incident Management
  - ☐ Special Express Delivery
  - ☐ Transhipment
- ☐ **SCM & Process**
  - ☐ Standardizing SCM
  - ☐ Market Report
  - ☐ Vendor Sourcing
  - ☐ Procurement

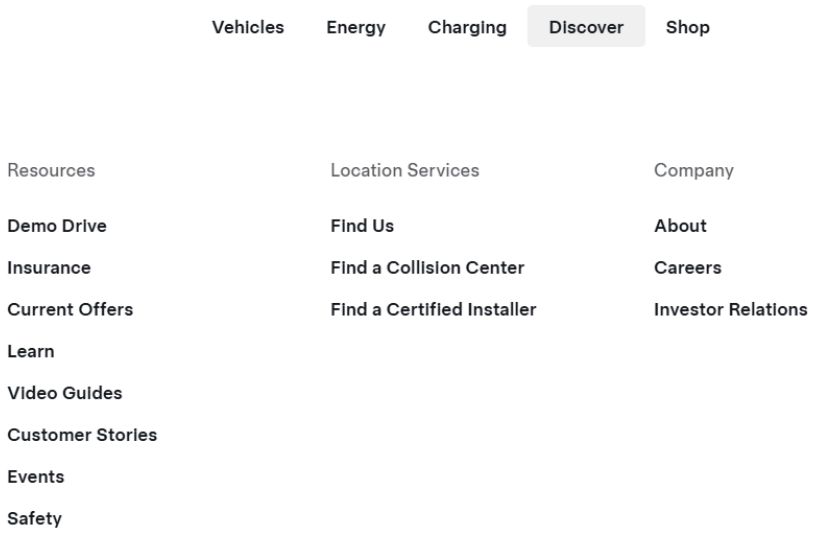

SELECTED SERVICES

Transport Management System (TMS)	$500.00
Warehouse Inspection	$150.00
Unloading Site Monitoring	$150.00
Loading Site Monitoring	$150.00
Audits at 3PL Warehouses	$350.00
GST Office Coordination	$200.00

Total amount for selected service- **$1500.00**

PAY NOW

3. Live Market
    - Book truck Now
    - Book Truck terminal space
    - Deploy On-field Lead
    - Secure Trip finance
    - Today Freight index
4. **Discover**

Just add these and remove the other things which are not mentioned here from the current site

Find our service location

find our offline HSEStores

HSE Shop

When we click on the HSEShop it should land on its homepage

In the menu we need to give find offline store - request for on-site store

It should be clearly visible and request for on-site store and below it must be like this we deploy our store and manage compliance as how you have done for merchandise and ppe . official chasehorse something like this. In the top right

5. Partners

- Partners menu should come right next to the login menu.

Join us - onfield logistics professionals

https://forms.gle/QmiddiuRkaRLbesEA

Join us - Transportation professionals,

- Transporters
- fleet owners
- Drivers
- freight traders
- freight financials

Join us - Truck terminal space

6. Login

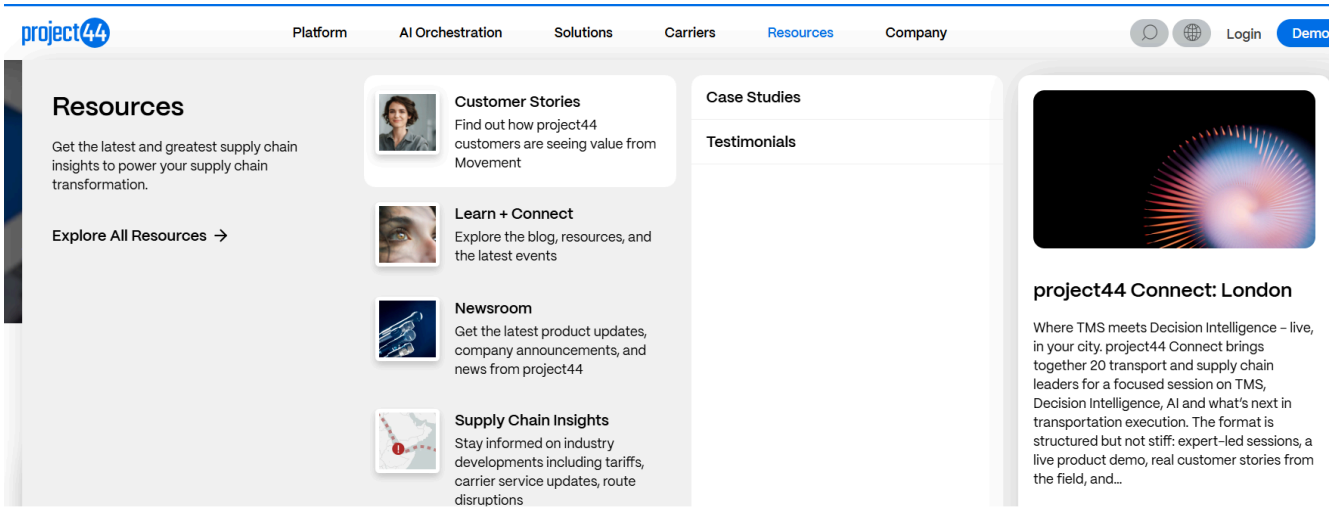

The current navigation bar needs to include the interactive animations and premium dropdown experience as illustrated in the below given website.

Reference website: https://www.project44.com/ai-agent-orchestration/

Need a similar type of navigation experience where:.

The reference website should be studied not only for its visual appearance but also for its interaction style, animation quality, content organization, and overall user experience.

Drop Down:

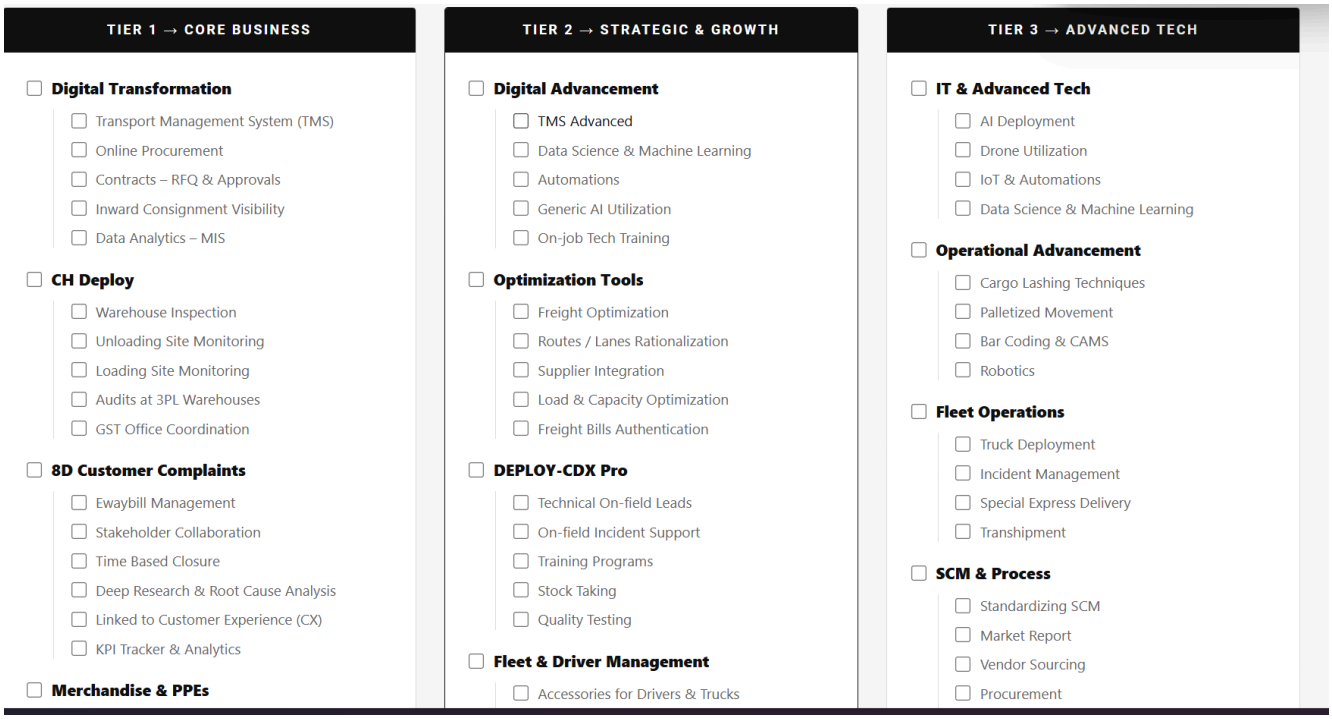

We need all these In the navibar

1. **Platform tab:** we need you add the same information which we have added in the home page of Odoo

Design Your solution : To be included under Solutions Menu

It should be like this so they can select the service they needed based on their requirement

Solution:

Shall be same as screenshot shared , ref to link in beginning.

Design menu, shall be coming under this on top.

Discover: we need like this

HSE Shop:

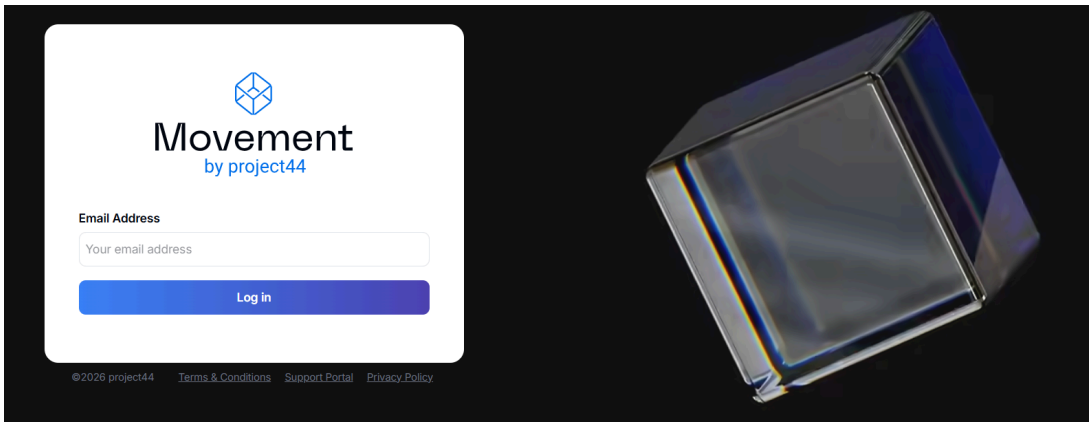

Partners:

Here we should add the form and WhatsApp group link so they can access directly

Link: https://forms.gle/QmiddiuRkaRLbesEA

Login:

The login should come in different tab.

2. Hero Section Requires a Dynamic images of solution/ service.

Image shall have below hyper links.

Know more

Book Now / Connect now

Whatsapp button with contact person image, to immediately connect.

The hero section should include HD images of core services.

Requirements include:

Platform (Discover more)

Few Services (like deploy and digital Transformation)

Discover more

Customers

Benefits of using platform

What it's going to be

Everything summary navigation in bottom

- Three high-quality videos should be used in the hero background.
- The videos should automatically transition in a smooth sequence.
- The transition between videos should have a premium sliding, fading, or cinematic effect.
- The videos should play continuously without disturbing the readability of the hero content.
- Appropriate overlays should be used so that the heading, description, and call-to-action buttons remain clearly visible.
- The videos should represent the complete scope of our company rather than presenting us only as a logistics or delivery company.
- The hero section should communicate our broader capabilities, including business services, consulting, growth, technology, operations, and other relevant service areas.

The objective is to immediately communicate that the company operates across multiple business verticals and offers a much broader range of solutions.

3. No Clear Explanation of the Three-Tier Service Structure

One of the most important aspects of our business model is that our services are organized into three different tiers. However, the current website does not clearly explain this structure.

The website should include a dedicated section that introduces and explains:

- Tier 1 – Core Business Services
- Tier 2 – Strategic & Growth Services
- Tier 3 – Advanced Operations & Technology Services

The user should immediately understand:

- Why the services are divided into three tiers.
- What type of services are included in each tier.
- Who each tier is designed for.
- How the three tiers are connected.
- How a business can select the appropriate service or combination of services.

This explanation should be presented visually using a premium layout, clear hierarchy, animations, icons, cards, or an interactive section.

4. No Individual Page and Workflow for Each Service

Currently, the website does not provide a dedicated page for every individual service. This is a major requirement.

Each service should have its own detailed page containing:

- Service title and overview.
- Detailed explanation of the service.
- Problems the service solves.
- Who the service is designed for.
- Key features and deliverables.
- Benefits to the client.
- Step-by-step workflow.
- Expected outcomes.
- Related services.

- Call-to-action or booking option.

The workflow is especially important. Users should be able to clearly understand how the service works from the initial consultation to final delivery.

The exact workflow should be customized according to each individual service rather than using the same generic process everywhere.

Home → Three-Tier Overview → Tier Page → Individual Service Page-> Individual subservice Page→ Workflow / Booking / Enquiry

This hierarchy is necessary to make the website easier to understand and navigate.

5. Merchandise Page Does Not Look or Function Like an E-Commerce Website

The current merchandise page does not provide a proper e-commerce experience.

The merchandise section should look and function like a professional online store. It should include:

- Proper product cards.
- Search and filtering options.
- Product sorting.
- Individual product detail pages.
- Product variants such as size or colour where applicable.
- Checkout process.
- Payment integration.
- Order confirmation.
- Order tracking where applicable.

The page should visually feel like a real e-commerce store rather than a basic product showcase or catalogue.

6. Client Login page

In that few of the thing need to be added in dashboard like course,

My account

Your Invoices

Follow, download or pay your invoices

Your Orders

Follow, view or pay your orders
